## About This Game

Ageod's Wars of Succession is a new game designed to cover two major wars that consumed Europe at the eve of the 18th Century. One was the War of Spanish Succession (1701-1713), pitting the French & Spanish Bourbons monarchs against the Grand Alliance built by Austrian Habsburg, Britain and the United Provinces. The other is the Great Northern War (1700-1721), between Sweden and Russia (and her allies), most of which focused around the succession of Poland. The two wars are played in separate scenarios.

In Wars of Succession you will coordinate the movements of several armies of many different great powers and their allies, take care of their supplies, fatigue and seek better conditions to engage combat, hold sieges or retreat to recover if needed.

### Scenarios

- Setting: the game covers all of Europe, from the Western seaboard to the Volga.
- Historical leaders: More than 200 historical leaders each rated on their abilities with over 200 different types of units from Grenadiers and Musketeers to Winged Hussars and Cossacks, as well as a dozen types of different warships
- Battlefield Tactics allow the player to make decisions that can turn the tide of battle.

### FEATURES

- Setting: the game covers all of Europe, from the Western seaboard to the Volga. The two different big wars focus each on one side of the continent (Spanish Succession over Western and southwest Europe, Great Northern War in Eastern

---

and Northeastern Europe). Time span is from 1700 to 1720.

- Game map is divided into more than 5,000 regions, with a variety of terrain, climates and development level.
- Scenarios: 5 in total, with 1 introductory (Italy 1701) tutorial and 2 main grand scenarios of Spanish Succession War and Great Northern War, plus 2 minor Western Europe campaigns scenarios (respectively 1706 and 1709)
- Historical leaders: More than 200 historical leaders each rated on their abilities and over 200 different types of units from Grenadiers and Musketeers to Winged Hussars and Cossacks, as well as a dozen type of different warships!
- Production: Control your nations spending on the military, economics and politics (domestic or foreign) through a few simple-to-understand assets and production centers locations.
- Regional Decision Cards: The game includes the already known card system that lets you trigger events such as Land Mines, Honors of War, Contributions, etc... this cards, if played wisely can affect the flow of a campaign.
- Detailed game model includes features such as Weather, Attrition, Supply, Prisoners and Fog of War
- Historical Events are triggered throughout the game giving the player crucial decision points. These cover anything from local uprising to foreign intervention in each of the conflicts.
- Battlefield Tactics allow the player to make decisions that can turn the tide of battle.
- Sieges and Naval warfare are all covered in detail in the game, with a lot of new siege-related flavour events better depicting that key aspect of war in the XVIIIth century.

Nice art, nice music. But the game is too short. I reached the real ending after 10 minutes. It's not as good as what I hope. But I still support you. Try your best next time.. Good game, fun with friends. :)

Edit: (31/05/2019)

The rework has now come out and the game is MUCH better. I'd really recommend it.. good streotypical action-mob gangsta game. it would'nt even load don't know how it got bbest reviews in the series. If you want a hunting unlimited game get the 2008 version. ing ♥♥♥♥♥♥♥♥ game... Do something... or try, at least .... Errors :/  
Got money... at least

It's quick, it's intensive, and it's awesome. What more could you want?. not worth it for its asking price but when it goes on sale I can totally recommend you pick it up!

super easy to get into and really fun with friends. Keeps on crashing .-. This game caught my attention at Dreamhack Austin - I was drawn to it for what I thought was a very unique gameplay mechanic. What I didn't expect was how beautiful the story and the music would be as well. I was hooked to keep going forward in the game, and at the same time, I had to pause sometimes to take in the background music. The story seemed simple but in the end, the complex relationships really moved me. It really takes you for a ride, and makes you feel some things.

See full review: <https://www.sleepytoadstool.com/reviews/blink-2017>. I don't think I've ever played a game quite like Polynomial 2. I originally thought "wow, Geometry Wars in VR" but this game is so much more. The visuals are intense and while it isn't hyper realistic, I think this game may be my favorite space shooter.

[I've only had a small amount of time with the game tonight but that will definitely grow in the weeks and months ahead as this game really is amazing in VR and very playable from what I can see on a flat monitor as well. Grab the Steam Summer Sale bundle while you can with the original game \(I haven't tried that one yet but it cost less for both than for just the second game!\). "This skin alters the projectiles and spells with dark magic instead of white magic!"](#)

[would love if it would do that, but the spells are exactly the same. i get disappointed more and more with my favourite game.. INCREDIBLY short, very simple stealth-based action game following a mother wolf in search of her captured pup.](#)

[Pretty visuals, a little replayability, some bugginess.](#)

[BE AWARE, some of the Steam achievements don't work.](#)

[But for \\$6, I got an hour of entertainment out of it and got to feel like a vengeful spirit of nature, so not bad!](#)
